

2014 has started strong for Osprey. The supply-chain has been strengthened and lead times are falling. Engineering has been expanded and new products are in the pipeline. Our global representation has been improved and the customer is in focus again.

Stability - Value - Growth are the new byline at Osprey, and there is more to come.

Osprey 800a Audio Card Available July 1

The new [Osprey 800a](#) audio add-on card is designed to extend the audio capabilities of all the Osprey 800 series capture cards. It can be ordered as an add-on to, or bundled with, any Osprey 800 series card for:

- Four stereo channels of additional audio
- Two independently configurable inputs for unbalanced, AES/EBU and SPDIF
- Two fixed stereo channels of balanced audio
- Available for pre-order

MPEG-2 Transport Capture Now Available for Osprey 825e and 845e

The latest upgrade to the Osprey 825e and 845e cards lets you capture an MPEG-2 Transport Stream.

- Available on Microsoft Windows OS only
- DVB ASI capture capability is available as an upgrade to your 825e and 845e and will be available as an added feature to new 825e and 845e cards after July .

For ordering details or more information, please contact Osprey at sales@ospreyvideo.com.

New Linux Modules and Windows Driver Support

Osprey has announced in-house support for:

- Linux modules for Osprey 260e, 460e, 820e and 845e - [Download](#) now!
- Linux module for Osprey 825e card will be available end of June
- Linux modules for analog Osprey PCI cards: Osprey 100, 210, 230, 440 and 530 will continue to be supported by LinuxTV.org
- Drivers for Windows 8.1 and Server 2012 available July 1st

Please contact Osprey at support@ospreyvideo.com for any questions regarding the Linux Kernel Modules.

Osprey by Variosystems offers capture cards for every need - from video-only camera feeds to high-density SDI content from four independent channels.

Osprey video technology continues to set the industry standard for high-quality, reliable streaming performance.
